

Shivam Shukla

AI Engineer — AI Agents — Backend Engineering

[Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [Email](#) | +91 8887780625 | India

SUMMARY

AI Engineer and Backend Developer focused on **AI agents, LLM workflows, cloud deployment, and backend systems**. B.Tech in Computer Science (2026) with hands-on experience in **Python, Java, Spring Boot, Groq, REST APIs, PostgreSQL, MySQL, Docker, AWS, and Supabase**. Builds practical AI applications with clear separation between LLM processing and application logic.

WORK EXPERIENCE

Full Stack Development Intern

Sep 2026 – Present

Auspify Technologies

India

- Working with the development team on **real-time projects and modern web solutions**, contributing to research, documentation, and project support.
- Developing practical software engineering and problem-solving experience through ongoing project work and collaboration.

Software Engineer Intern

Jul 2025 – Sep 2025

Soft Pro

Noida, India

- Developed backend **REST APIs** using **Java 17, Spring Boot 3, MVC, and OOP**; integrated MySQL with Hibernate ORM and tested APIs using Postman.

PROJECTS

Yojna Setu — AI Agent & Eligibility System | *Java, Spring Boot, Groq, Twilio, PostgreSQL* | [GitHub](#)

2026

- Built a conversational **WhatsApp AI workflow** using Groq and Twilio to extract structured information from user input.
- Separated LLM extraction from decision logic using a **Java rules engine** to evaluate eligibility against data for **82 welfare schemes**.
- Implemented backend workflows, PostgreSQL data storage, REST APIs, and automated validation with **42 tests**.

RealGuard — Conversational AI Automation | *Java, Spring Boot, Groq, Twilio, MySQL* | [GitHub](#)

2026

- Built a **WhatsApp conversational workflow** using Groq to extract real-estate parameters such as budget, location, and property type.
- Implemented EMI calculations, RERA lookup workflows, lead qualification, and database persistence with Spring Boot and MySQL.

QuickEats — Full-Stack Ordering Platform | *Java, Spring Boot, PostgreSQL, Groq, React* | [GitHub](#)

2025

- Built a full-stack ordering platform with **Spring Boot 3**, React, REST APIs, relational persistence, and real-time order updates.
- Implemented **JWT authentication, ownership validation, and server-side price validation** for secure order processing.
- Verified backend behavior with **71 executable tests across 23 test classes**.

TECHNICAL SKILLS

AI: Python, AI Agents, LLM Integration, Groq API, Tool Calling, RAG

Backend: Java, Spring Boot, Spring Security, REST APIs, Hibernate ORM

Cloud & DevOps: AWS, Docker, Containerization, Cloud Deployment, CI/CD Fundamentals

Databases: PostgreSQL, MySQL, SQL, Supabase

Tools: Git, GitHub, Postman, Maven, Twilio

EDUCATION

Shri Ram Murti Smarak CET&R

Bareilly, India

B.Tech, Computer Science and Engineering – 70%

2022 – 2026

Nav Jeevan Mission School

Kushinagar, India

Senior Secondary, CBSE – 70%

2021

CERTIFICATIONS

[AWS Cloud Practitioner Essentials](#) – AWS Training & Certification

[Advanced Software Engineering Job Simulation](#) – Walmart Global Tech (Forage)

[Java with Spring Boot Internship](#) – Soft Pro
